new residences or new joint living-work quarters for artists are allowed as-of-right or by special permit or authorization. "Steady state vibrations" are earth-borne oscillations that are continuous. Discrete pulses that occur more frequently than 100 times per minute shall be considered to be steady state vibrations. Three-component measuring system. In all Manufacturing Districts, the density of emission of smoke during normal operations shall not exceed Standard Smoke Chart number 2, and the quantity of smoke shall not exceed a maximum of 10 smoke units per hour per stack in M1 Districts, 20 such units in M2 Districts, and 30 such units in M3 Districts.

Community School District #2, in New York City, has been engaged in a long-term process of system-wide instructional improvement, now in its eleventh year. This process involves, among other things, heavy investments in professional development for teachers and principals that are focused on introducing and supporting specific instructional practices in literacy and mathematics, coupled with system-level and school-level accountability processes designed to assure high quality instruction in all schools and classrooms.

Continuous improvement in community district #2, New York City
