There are many reasons why a cookie could not be set correctly. Below are the most common reasons:

- You have cookies disabled in your browser. You need to reset your browser to accept cookies or to ask you if you want to accept cookies.
- Your browser asks you whether you want to accept cookies and you declined. To accept cookies from this site, use the Back button and accept the cookie.
- Your browser does not support cookies. Try a different browser if you suspect this.
- The date on your computer is in the past. If your computer's clock shows a date before 1 Jan 1970, the browser will automatically forget the cookie. To fix this, set the correct time and date on your computer.
- You have installed an application that monitors or blocks cookies from being set. You must disable the application while logging in or check with your system administrator.

**Why Does this Site Require Cookies?**

This site uses cookies to improve performance by remembering that you are logged in when you go from page to page. To provide access without cookies would require the site to create a new session for every page you visit, which slows the system down to an unacceptable level.

**What Gets Stored in a Cookie?**

This site stores nothing other than an automatically generated session ID in the cookie; no other information is captured.

In general, only the information that you provide, or the choices you make while visiting a web site, can be stored in a cookie. For example, the site cannot determine your email name unless you choose to type it. Allowing a website to create a cookie does not give that or any other site access to the rest of your computer, and only the site that created the cookie can read it.

“Today’s real estate strategies have to focus on delivering ‘growth without growth’—expanding a corporation’s capabilities without spikes in capital investment or operational expense.” More than 400 corporate real estate executives from around the world participated in the CBRE survey. Nearly half (49 percent) cited economic uncertainty as their greatest challenge, while 43 percent noted cost escalation as their greatest challenge. Forty-eight percent projected a stable real estate footprint for this year. Seventy-nine percent stated that they are actively using space-efficiency initiatives—

In reality, Corporate Real Estate Management is much more than that. Here are the 6 Corporate Real Estate Strategies that can add value to your business - if you just let them. While all of the strategies mentioned above can add value to any business, it is important that the decisions made around Corporate Real Estate Management are directly linked to the strategic objectives of the business across levels. At a minimum, the corporate real estate staff must possess knowledge of the core business and understand how to best communicate its contribution to the organisation in a language that the top decision makers can understand. Would you like to know more about how corporate real estate can add value to your organisation? Abstract: An organization’s real estate decisions will be effective if such decisions support the enterprise’s overall business objectives. This result can be achieved only by the explicit consideration of how real estate strategy supports corporate strategy and the substrategies for component elements of the corporation, and then in turn how specific real estate operating decisions support the real estate strategy. This approach provides a context for negotiating competing interests and increases the likelihood that a specific real estate decision will be consistent with the enterprise’s overall business objectives.
